

**Geisel School of Medicine at Dartmouth  
Dartmouth-Hitchcock Medical Center  
CURRICULUM VITAE**

**NAME:** Joshua Levy PhD

**Date Prepared:** 4/21/2023

**Address:** Office:  
Department of Pathology & Laboratory Medicine  
Dartmouth-Hitchcock Medical Center  
One Medical Center Drive  
Lebanon, NH 03756  
Tel: (603) 650-3844  
E-mail: [Joshua.j.Levy@hitchcock.org](mailto:Joshua.j.Levy@hitchcock.org)  
Website: <https://levylab.host.dartmouth.edu/>  
GitHub: <https://github.com/jlevy44>  
LinkedIn: <https://www.linkedin.com/in/joshua-levy-87044913b/>  
ORCID: <https://orcid.org/0000-0001-8050-1291>  
Google Scholar: <https://scholar.google.com/citations?user=vR39CWkAAAAJ>  
MyNCBI: <https://www.ncbi.nlm.nih.gov/myncbi/1fgQvdpod0SEEc/bibliography/public/>

**I. EDUCATION:**

2017 BS in Physics  
University of California, Berkeley, CA  
College of Letters & Sciences: Highest Distinction graduation (top 1%)

2021 PhD in Quantitative Biomedical Sciences (Data Science)  
Dartmouth College, Geisel School of Medicine, Hanover, NH  
Co-mentors: Brock C. Christensen PhD (Department of Epidemiology)  
Louis J. Vaickus MD, PhD (Department of Pathology and Laboratory Medicine)

Technical and Research skills:

Python • R • Shell • Supercomputer • Machine Learning • Dataviz • PyTorch • NLP  
Sklearn • Plotly • Aircraft Pilot • Dask • Matlab • Javascript • C++ • SQL  
Deep Learning • Docker • AWS • LaTeX • Nextflow • CWL Pipelines • Stan  
Comp. Vision • Sensibly Constructing Statistical Golems • Graph Neural Networks

Relevant coursework:

Hierarchical, Bayesian Modeling, Social Network Analysis, Epidemiology, Biostatistics,  
Bioinformatics, Linear Algebra, Diff. Eq., Multivar. Calc., C++, Python, Statistics,  
Machine Learning, Health Promotion, Policy, Management, Quantum Computing and  
Stat Mechanics

**II. POSTDOCTORAL TRAINING:** N/A

**III. ACADEMIC APPOINTMENTS:**

2021-present Assistant Professor, Geisel School of Medicine at Dartmouth,  
Department of Pathology and Laboratory Medicine

2021-present Assistant Professor, Geisel School of Medicine at Dartmouth,  
Department of Dermatology

- 2021-present Assistant Professor, Geisel School of Medicine at Dartmouth,  
Department of Epidemiology
- 2021-present Faculty, Geisel School of Medicine at Dartmouth,  
Quantitative Biomedical Sciences
- 2022-present Faculty, Dartmouth Hitchcock Medical Center,  
Department of Medicine, Section of Radiation Oncology

#### **IV. INSTITUTIONAL LEADERSHIP ROLES:**

- 2018-present EDIT (Emerging Diagnostic and Investigative Technologies) Research Program  
Editor, Department of Pathology and Laboratory Medicine, DHMC.  
Co-director of EDIT Machine Learning and Whole Genome Sequencing arms.

#### **V. LICENSURE AND CERTIFICATION: N/A**

#### **VI. HOSPITAL OR HEALTH SYSTEM APPOINTMENTS: N/A**

#### **VII. OTHER PROFESSIONAL POSITIONS (NON-DARTMOUTH):**

- April 2015- Jun 2016 CiBER lab, Berkeley, CA Biomechanics Research Assistant  
• Agama Lizard Turns: Matlab and ProAnalyst analysis of lizard turning tendencies
- Jun 2016- May 2020 Lawrence Berkeley National Lab, JGI Affiliate, Berkeley, CA Software Developer  
• Novel computational methods elucidate quality biofuels: pangenome phylogenetics, genomics workflows, metagenomics binning, machine learning via large-scale, automated, supercomputer pipelines (Python/Nextflow)
- Jun - Dec 2017 San Francisco Department of Public Health: Tuberculosis Control, San Francisco, CA Public Service Aide  
• Evaluated patient data integrity and transition to electronic health records.
- May-Aug 2018 Zymergen, Emeryville, CA Software Engineer Intern  
• Constructed many different HPC AWS bioinformatics pipelines using CWL Docker, and Seven Bridges, storing results in SQL databases.  
• Used Convolutional Neural Networks and hyperbolic embeddings to explore relationships between gene and function for discovery of biomaterials.
- Jan 2020-present ArcticAI, Hanover, NH Chief Technical Officer  
• Developing core technology, IP, and vision for intraoperative medical device
- May 2022-present ViewsML, Hanover, NH Scientific Advisor  
• Consulting and informatics for virtual staining technologies
- Oct 2020-present Veterans Affairs Healthcare System, White River Junction, VT Statistical Consultant  
• Consulting on machine learning-based natural language processing software for suicide risk prediction
- Oct 2022-present DCC Trace Element Analysis Core, Lebanon, NH Statistical Consultant  
• Consulting on machine learning-based and statistical methods for assessing high resolution elemental imaging maps

**VIII. PROFESSIONAL DEVELOPMENT ACTIVITIES:**

2018-present	CITI Program, Biomedical Responsible Conduct of Research (RCR) course completion
2018-present	CITI Program, Biomedical Data or Specimens Research Basic course, completion
2018-present	CITI Program, Good Clinical Practice (US, FDA focus) clinical trials with investigational drugs and medical devices (GCP) course completion
2019	Supervised Teaching Workshop, Mentor Skills Development
2019	NIH Grant Workshop
2017	Coaching Corps Leadership Development Program
2016	Crisis Support Counselor Training Program

**IX. TEACHING ACTIVITIES:****A. UNDERGRADUATE (COLLEGE) EDUCATION: N/A****B. GRADUATE EDUCATION:****Courses:****Professional Level / Online:**

TBD	Applied Machine Learning (QBS)	150 hr/yr
-----	--------------------------------	-----------

**Graduate Level:**

2022	Participation in Scientific Research (QBS 195)	150 hr/yr
2021-2022	Independent Study (QBS 195) (x6 students)	150 hr/yr
2022	Master's Capstone Experience (QBS 185)	150 hr/yr
2021	Faculty Seminar Student Projects (QBS 110.5)	150 hr/yr
2023	QBS Journal Club– Machine Learning	40 hr/yr
2023	QBS Journal Club– AI and Placental Histology	40 hr/yr
2023	QBS Journal Club– Spatial transcriptomics technologies	40 hr/yr

**Lectures:**

2020	Introduction to Python (QBS 146)	2 hr/yr
2021	Introduction to Neural Networks (QBS 177)	2 hr/yr
2021	Application of Hierarchical Bayesian Methods to Machine Learning (QBS 122)	3 hr/yr
2021-2022	Machine Learning in Pathology (QBS 110)	3 hr/yr
2021	R Software Packaging (QBS 181)	3 hr/yr
2022	Introduction to Neural Networks (QBS 177)	2 hr/yr
2022	Artificial Intelligence @ Dartmouth Health (ENGS 56)	2 hr/yr
2023	Introduction to Neural Networks (QBS 177)	2 hr/yr
2023	Artificial Intelligence @ Dartmouth Health (ENGS 56)	2 hr/yr

**Supervised Teaching:****Graduate Level:**

2019	Foundations of Biostatistics (QBS 120)	150 hr/yr
2020-2021	Statistical Learning for Big Data (QBS 177)	150 hr/yr
2021	Hierarchical Bayesian Modeling (QBS 122)	150 hr/yr

**Graduate Workshop:**

2020	Fundamentals of Bioinformatics and High-Performance Computing	3 hr/yr
------	---	---------

**C. UNDERGRADUATE MEDICAL EDUCATION:****Medical Student Enrichment Elective:**

2023	Introduction to Data Science and Applications	50 hr/yr
2023	Digital Health Scholars Program – Medical Curriculum Design	40 hr/yr

**D. GRADUATE MEDICAL EDUCATION:****Pathology Residents**

2023	Medical Informatics & AI	20 hr/yr
------	--------------------------	----------

**E. MULTIDISCIPLINARY / INTERDEPARTMENTAL:**

2021	Mentorship Ethics Discussion Panelist	3 hr/yr
------	---------------------------------------	---------

**X. RESEARCH ADVISING/MENTORING:****Program Director, EDIT (Emerging Diagnostic and Investigative Technologies)**

DPLM's newly established EDIT Lab sponsors highly qualified high school students to participate in a 10-week remote internship exploring research topic in digital pathology, machine learning and statistics. Through a series of lectures, guided projects and IRB supported basic research, students develop algorithms to explore various diagnostic spaces in pathology from cancer detection, to gigapixel image manipulation to text prediction. Undergraduate, Master's and medical students have participated in the ongoing year-round internship program. Joshua Levy and Louis Vaickus manage and organize the internship as Co-PI's. At the end of the 10-week program, internship culminates with a presentation to the DPLM faculty, residents and technical staff. Twenty interns have manuscripts in pre-print and submitted to journals; five have been published. The 2020 internship was so popular that we were able to recruit over 25 new interns for 2021 with many alumni returning to give selected lectures and mentor incoming students. We have run pilot programs for the past 3 years, and last summer, 2022, we had 36 high school students (many from rural NH/VT), who presented at national conferences, participated in science fairs, co-authored academic papers, matriculated to college, and successfully applied for scholarships. Students in the EDIT AI program work as members of existing labs to develop and apply AI technologies across a range of diagnostic methods and medical specialties, from cancer detection and gigapixel image manipulation to text prediction and spatial omics. Students are mentored by biomedical researchers and clinicians and discuss their work with clinical collaborators in a weekly seminar series. They learn to design and pitch projects, to use and develop open-source, reproducible biomedical informatics software, and to work in a team culture that promotes broad collaboration. At the end of the summer, students present in a center-wide poster and presentation session. Mentors meet with students prior to these presentations and students are encouraged to consider how their work would impact "big picture" clinical practices rather than only focusing on computational aspects. Students are challenged to think critically about the successful design of clinically impactful technologies. Our goal is that students' experiences in EDIT AI will continue to shape how they engage project stakeholders both during and after their time at Dartmouth. The EDIT AI program is currently under review at the NIH for a R25 Science Educational Partnership grant (PAR-20-153). Last year's end-of-summer presentation day featuring select student groups can be found here: <https://www.youtube.com/watch?v=RCHfBC6jEQk> and our virtual conference page is <https://editai.conference.levylab.host.dartmouth.edu/> (password: edit2022).

**HIGH SCHOOL STUDENTS:****2020 Summer Cohort**

2020	Ajay Prabhakar	EDIT Summer Intern	Morphology Hierarchy
2020	Kaïen Yang	EDIT Summer Intern	Secure Data Encryption
2020	Richard Zhan	EDIT Summer Intern	Virtual Staining
2020-Present	Sumanth Ratna	EDIT Summer Intern	Segmentation
2020-2021	Harsha Harish	EDIT Summer Intern	Cell/Tissue Clustering
2020-2021	Nishitha Vattikonda	EDIT Summer Intern	Natural Language Processing

**2021 Summer Cohort**

2021-Present	Sachin Kumar	EDIT Summer Intern	3D Tissue Modeling
2021-Present	Ramya Reddy	EDIT Summer Intern	Morphological-Molecular Alteration

2021-Present	Ram Reddy	EDIT Summer Intern	Morphological-Molecular Alteration
2021-Present	Akshat Alok	EDIT Summer Intern	Omics Deep Staging Models
2021-Present	Zarif Azher	EDIT Summer Intern	Multimodal Integration
2021-Present	Andrew Wang	EDIT Summer Intern	Cellular Hierarchy
2021-Present	Akash Pamal	EDIT Summer Intern	Surgical Cell Modeling
2021-Present	Irfan Nafi	EDIT Summer Intern	Surgical Cell Modeling
2021-Present	Tarushii Goel	EDIT Summer Intern	Surgical Cell Modeling
2021-Present	Abhinav Angirekula	EDIT Summer Intern	Surgical Cell Modeling

#### **A. UNDERGRADUATE**

##### **Dartmouth College, Hanover NH**

2019-Present Jason Zavras - Presidential Scholar

Computational Stain Normalization  
Intra-institutional digital stain preference

2020-Present	Jason McFadden	Evaluation AI Technologies
2021	Osezele Okoruwa	Stain Preference
2021-2022	Jean Yuan	Medical Informatics
2021-2022	Daniel Dong	Medical Informatics
2022-Present	William Chen	Data Evaluation
2022-Present	John Zavras - Presidential Scholar	Spatial Profiling
2022-Present	Sabin Hart	DNA Methylation
2022-Present	Gokul Srinivasan	Dermatology
	High Honors Thesis: Srinivasan, Gokul, "Deep Learning for Skin Photoaging" (2023). <i>Computer Science Senior Theses</i> . 5.	
2022-Present	David Kaufmann	Cancer Immunology
2022-Present	Cinay Dilibal	Medical Informatics
2022-Present	Julia Shen	Placenta
2023-Present	Kamren Khan	Dermatology
2023-Present	Art Robinson	Dermatology Phone Application Photoaging
2023-Present	Onyinyechi Owo	Pathology & Biomedical Engineering
2023-Present	Zoefaith Caraballo-Bobea	Placental Histology

#### **George Mason University**

2022-Present	Suchita Hadimani	Image analysis
--------------	------------------	----------------

#### **Middlebury College**

2021-Present	Jack Greenburg	Natural Language Processing for CPT Code Billing
--------------	----------------	--

#### **University of Michigan**

2021-Present	Carly Miles	Medical Informatics
--------------	-------------	---------------------

#### **UC Santa Cruz**

2022-Present	Bailey Thompson	Medical Informatics
--------------	-----------------	---------------------

#### **University of New Hampshire**

2022-Present	Tess Cronin	Machine Learning Review
--------------	-------------	-------------------------

#### **Brigham and Women's Hospital / Harvard**

2023-Present	Duarte Albuquerque	Computational Urology
--------------	--------------------	-----------------------

#### **Other Institutions**

2022	Deepanshu Mody	DNAm Aging
2022-2023	Serin Han	TBD

#### **B. GRADUATE:**

2020-Present	Brody McNutt	Master's Student (QBS)	Secure Data Encryption
2020-2022	Julian Gullett	Master's Student (QBS)	Evaluation AI Technologies
2021-Present	Yunrui Lu	Master's Student (QBS)	Natural Language Processing
2021-Present	Uhuru Kamau	Master's Student (QBS)	Natural Language Processing
2021-Present	Shuyang Lu	Master's Student (QBS)	Natural Language Processing
2021-Present	Taylor Hudson	Master's Student (QBS)	CRISPR
2021-Present	Sean McOsker	Master's Student (QBS)	Model Explainability
2022-Present	Natt Chan	Master's Student (QBS)	Pathology
2022-Present	Ojas Ramwala	UWashington/NYU CS PhD	Digital Pathology
2021-2022	Jeff Joseph	PhD Rotation (QBS) & Qual	Spatial Correlations

2022	Peiyong Hua	PhD Rotation (QBS)	NLP
2023	Thadryan Sweeney	PhD Rotation (QBS)	Regression Trees
2023	Ji-Qing Chen	PhD Candidate (MCB)	Multimodal Bladder Cancer WSI
2021-Present	Sean Pietrowicz	Master's Student (QBS)	Mental Health
2022-Present	Chenhao Zhao	Master's Student (QBS)	Bayesian Statistics
2022-Present	Matthew Chan	Master's Student (QBS)	Medical Informatics
2022-Present	Bofan Chen	Master's Student (QBS)	Imaging
2022-Present	Digvijay Yadav	Master's Student (QBS)	Surgical Technologies
2022-Present	Ayush Chakraborty	Master's Student (QBS)	NLP
2022-Present	Minchuan Qin	Master's Student (QBS)	Image Analysis
2022-Present	Sunishka Jain	Master's Student (CS)	NLP

#### **Current Dissertation Students:**

2021-Present	Marietta Montivero	Geisel MD PhD Student	Surgical Excision/Dermatology
2021-Present	Elizabeth Anderson	PhD Student (QBS)	Placenta Histology
	Doctoral Thesis Co-Mentored with Caitlin Howe (Epidemiology)		
2022-Present	Alos Diallo	PhD Student (QBS)	Spatial Transcriptomics
	Doctoral Thesis Co-Mentored with Brock Christensen (Epidemiology)		
2023-Present	Grace Rosner	PhD Student (MCB)	Spatial Transcriptomics
	Doctoral Thesis Co-Mentored with Kelli Pointer (Radiation Oncology)		

#### **C. MEDICAL STUDENTS:**

2020-2021	Eren Veziroglu	Medical Student	Digital Spatial Profiling
2020-2021	Mustafa Nasir Moin	Medical Student	Digital Spatial Profiling
2022-Present	Raven Bennett	Geisel MD Student	Microbiome
2022-Present	Shahin Shahsavari	Geisel MD Student	Skin Aging
2022-Present	Faraz Farhadi	Geisel MD Student	Orthopedics
2022-Present	Harun Sugito	Geisel MD Student	Orthopedics
2022	Alex Lindqwister	Geisel MD Student	Med AI Education
2022-Present	Angel Moore	Geisel MD Student	Med AI Dermatology
2022-Present	Elizabeth Krogman	Geisel MD Student	Med AI Dermatology
2022-Present	Soo Hwan Park	Geisel MD Student	NLP
2022-Present	Travis Byrum	Geisel MD Student	NLP
2022-Present	Liam Locke	Geisel MD Student	NLP
2022-Present	Nicholas An	Geisel MD Student	Skin Photoaging
2023-Present	Meave Otieno	Geisel MD Student	Cancer Informatics
2018-2021	Christian Haudenschild	Medical Student Minnesota	Federated Data Networks

#### **D. RESIDENTS/FELLOWS:**

2019-2021	Robert Hamilton	Pathology Resident/Fellow	Auto-Machine Learning
2019-2021	Chris Jackson	Pathology Resident/Fellow	Virtual Immunofluorescence
2020-2021	Ryan Glass	Pathology Resident/Fellow	Bayesian Cytology Prediction
2022-Present	Abdol Aziz	DH Pathology Resident	Graph Neural Networks
2023-Present	Sam Harvey	Johns Hopkins Pathology	Urine Cytology ML

#### **E. RESEARCH ASSOCIATES:**

2018-2021	Jorge Lima	Data Scientist	Pressure Injury Prediction
2020-Present	Max Levis	Assistant Professor	NLP Suicide Risk
2021-Present	Brady Hunt	Data Scientist	Radiation Oncology
2019-Present	Carly Bobak	Data Scientist	Graphs & Networks

#### **F. FACULTY:**

2022-Present	Marthony Robins	Medical Physicist	Radiation Oncology
--------------	-----------------	-------------------	--------------------

2022-Present	Louis Vaickus	Pathologist	Bladder Cancer Screening (K08)
--------------	---------------	-------------	--------------------------------

## **XI. ADVISING / MENTORING:**

### **A. UNDERGRADUATE STUDENTS: N/A**

### **B. GRADUATE STUDENTS:**

#### 2020 QBS Student Mentor

2020-2022	Julian Gullett	Master's Student (QBS)	Career Mentoring
2021-Present	Sean Pietrowicz	Master's Student (QBS)	Career Mentoring

#### 2022 QBS Faculty Mentor

2022	Alos Diallo	QBS PhD Student	Career Mentoring
2022	Kevin Rouse	Master's Student (QBS)	Career Mentoring
2022	Anton Hung	Master's Student (QBS)	Career Mentoring
2022	Sukriti Ghosh	Master's Student (QBS)	Career Mentoring
2022	Aislinn Gilmour	Master's Student (QBS)	Career Mentoring
2022	Tianyue Zhou	Master's Student (QBS)	Career Mentoring

### **C. MEDICAL STUDENTS: N/A**

### **D. RESIDENTS/FELLOWS/RESEARCH ASSOCIATES: N/A**

## **XII. ENGAGEMENT, COMMUNITY SERVICE / EDUCATION:**

2015	American Heart Association Advocacy, Advocacy Intern, Oakland, CA
2011-2019	Special Olympics, Head Coach, Walnut Creek, CA
2015-2018	Coaching Corps, King Middle School, Basketball Coach, Berkeley, CA
2015-2018	Coaching Corps Berkeley Chapter Executive Recruitment Coordinator, Berkeley, CA
2015-2017	American Foundation for Suicide Prevention, Outreach Coordinator, Berkeley, CA
2011-2016	Telescope Makers Workshop, Astronomy Docent and Telescope Maker, Mount Diablo Astronomical Society, Berkeley, CA
2015-2018	National Suicide Prevention Lifeline, American Foundation for Suicide Prevention, Oakland, CA
2019	New Hampshire Academy of Sciences Mentor, Lyme, NH
2019	New Hampshire Special Olympics Volunteer, Lyme, NH
2020	Community Outreach Executive, Student Council, Hanover, NH Special Olympics and Upper Valley Haven Shelter Food
2023	Dartmouth Undergraduate Admissions Recruitment & Outreach Collaboration

## **XIII. RESEARCH ACTIVITIES:**

### Present:

2021-	Prouty Grant <i>CRISPR Targeting of Merkel Cell Polyomavirus</i>	Levy J (Co-PI)	\$50,000
2020-	Prouty Grant <i>Validation of In-Vivo Imaging</i> (20%)	LeBeouf M (Co-PI)	\$50,000
2021-	Sun Damage Reversal Therapies (COBRE Pilot, P20GM104416)	Levy J (PI)	\$80,000
2022-	Dartmouth Hitchcock ORO Capital Investment, <i>Pathology Advanced Computational Environment</i>	Levy J (Co-PI)	\$250,000
2021-	Richard Baughman Scholar Award	Levy J (PI)	\$300,000
2021-	Burbank Study	Levy J (Mentor)	
2022-	Student Digital Pathology Laboratory 2.0 (Neukom)	Levy J (Co-PI)	\$18,000
2022-	Stephen Marsh Tenney, M.D., Medical Student Fellowship Award	Co-Mentor	\$30,000
2022-	Burroughs Wellcome Fellowship	Co-Mentor	\$60,000
2022-	Conflict Analysis VA Web Intervention: A Whole Health	Levy (Site-PI)	DH-\$12,000

	Resource for Rural Veterans		
2022-	R24 Biomedical National Elemental Imaging Resource (BNEIR)	Levy J (Site-PI)	DH-\$271,000
2022-	NIGMS P20GM130454 Project Leader: Predicting colon cancer metastasis through spatial molecular characterization of the tumor immune microenvironment	Levy J (PI)	\$1,250,000
2022	Informatics Software to Develop Cell-Type Specific Spatial Molecular, Elemental and Histological Signatures Associated with Tumor Metastasis	Levy J (PI)	\$60,000
2022	Machine Learning Strategies for Predicting the Risk of Suicide Using Clinical Note Text	Levy J (Site-PI)	\$2,000,000
	Department of Defense		DH-\$465,000
2023	Phase IIa interim analysis of the effects of L-serine in ALS	Levy J (Co-I)	\$10,000
2023	DCC CRTEC High School Initiative EDIT AI Program Coordinator	Levy J (PI)	\$8,000
2022	Semi-automated bladder cancer screening using machine learning: clinical validation and implementation	Vaickus L (Levy Mentor)	\$1,000,000

#### **Past:**

2016	Online Mental Health Education at UC Berkeley	Levy J (Co-PI)	\$30,000
2019	Burroughs Wellcome Fund, Big Data Life Sciences Fellow	Levy J (PI)	\$60,000
	100% effort		
2020	I-Corps Business Development (33% effort)	Levy J (Co-PI)	\$3,000
2020	COBRE CQB Paper Travel Award	Levy J (PI)	\$2,000
2021	Dartmouth Entrepreneurs Startup Competition Finalist (33%)	Levy J (Co-PI)	\$5,000
2020-	Dartmouth Hitchcock ORO Capital Investment,	Levy J (Co-PI)	\$160,000
2022	<i>QDP-Alpha</i> (33% effort)		
2020	Neukom Institute CompX	Sriharan A (Co-I)	\$40,000
	<i>Virtual Flow Cytometry</i> (20% effort)		
2020	Neukom Institute CompX	Levy J (Co-PI)	\$25,000
	<i>Virtual Laboratory for Students</i> (95% effort)		
2020	Quantitative Biomedical Sciences, TA Fellowship	Levy J (PI)	\$5,000
	100% effort		
2021	Single Cell Genomics Core Visium Pilot Funds	Levy J (Co-PI)	\$10,000
2022	ELLIS Travel Award, EDIT students Ram and Ramya Reddy	Levy J (PI)	\$3,000
2021-	IDEA States Pediatric Clinical Trials, Biostatistics Consulting	Levy J (Co-I)	\$5,000
2022			(directs)
2020-	Dartmouth-Hitchcock Department of Psychiatry, Tucker Award	Levis M (Co-I)	\$24,000
2022			(directs)
2022	Hitchcock Foundation Pilot, Komal Satti	Levy J (Co-I)	\$40,000
	<i>How Obesity Influences the Immune Repertoire in Children. A Pilot Study</i>		

#### **Pending:**

2022	Opening DOORS to Low-Cost Library Synthesis for CRISPR Off-Target Screening	Levy J (PI)	\$40,000
2022	Deep Learning Histomorphological Choriocarcinoma Triage System (American Cancer Society)	Levy J (PI)	\$30,000
2022	Development of a crowd peer review platform for transdisciplinary computational research	Levy J (Co-PI)	\$40,000
2021	Advancing Clinical Translational Science through Validation of Emerging Diagnostic Artificial Intelligence Technologies	Levy J (PI)	\$1,250,000
2022	Machine Learning, NLP, Suicide Prevention	Levis M (Co-I)	\$18,000
			(directs)
2022	Evaluating choriocarcinoma risk factors in first trimester miscarriages using quantitative deep learning histological assessments of abnormal villous morphology	Levy J (PI)	\$30,000

2022	Emerging Diagnostic and Investigative Technologies (EDIT) AI: a virtual summer program for underserved high school students exploring artificial intelligence applications in medicine	Levy J (PI)	\$1,250,000
2022	Pre-operative Stereotactic Radiosurgery (SRS) for Brain Metastases with or without Hyperbaric Oxygen (HBO): an Exploratory Molecular Marker Analysis	Levy J (Co-PI)	\$100,000
2022	Impact of Phenols on Healthy Placental Growth	Levy J (Site-PI)	\$4,000,000
2023	Characterizing microbiomic and transcriptomic profiles in hidradenitis Suppurativa	Levy J (Co-I)	\$100,000
2023	Cell Type Metals, Spatial Transcriptomics Placenta	Levy J (PI)	\$500,000
2023	Deep Learning Placenta Histopathology	Levy J (PI)	\$500,000
2023	Confidence Intervals for High Dimensional Imaging and Network Visualization in Health Science	Levy J (Co-PI)	\$500,000
2023	Modifying immunohistochemical protocols for multiplexed imaging of inorganic elements and metal	Levy J (Site-PI)	\$4,000,000
2023	Program for Oncology Workforce Education and Research Experience at Dartmouth (R25)	Fiering S (Levy: Mentor) TBD	
2023	Federated Learning P30 Administrative Supplement	Levy J (Site-PI)	\$300,000
2023	PRESS, a novel non-invasive tool for detection and assessment of skin tumor based on protoporphyrin IX (PPIX) fluorescence.	Levy J (Co-I)	\$100,000

#### **XIV. PROGRAM DEVELOPMENT:**

Aug 2018 – present:

##### **EDIT (Emerging Diagnostic and Investigative Technologies)**

Research Program, Department of Pathology and Laboratory Medicine, DHMC, Lebanon, NH

- Investigating emerging diagnostic deep learning technologies: molecular, histopathological, text, and image (Founder EDITor)
- Collaborating with other EDITors to automate diagnostic technologies
- User-centered design and validation.
- Machine-learning arm co-lead, whole genome sequencing
- Internship program co-head: conception, mentorship, skill development

#### **XV. ENTREPRENEURIAL ACTIVITIES:**

Related to the design of deep learning techniques for the analysis of whole slide images and high-resolution anorectal manometry devices (ongoing).

- I-Corps Incubator
- Dartmouth Innovations Accelerator
- DRIVEN Accelerator
- Dartmouth Entrepreneurs Startup Competition Finalists
- 3 Patents Pending

#### **XVI. MAJOR COMMITTEE ASSIGNMENTS:**

**International:** N/A

**National:** N/A

##### **Institutional:**

2018-

2021 Synergy Biostatistics Consultant, Geisel School of Medicine at Dartmouth, Hanover, NH

2022- DCC Trace Element Analysis Core Statistical/Machine Learning Consultant, Hanover, NH

2022- CQB COBRE Project Leader, Hanover, NH  
 2019-  
 2021 Burroughs Wellcome Fund Fellow, Geisel School of Medicine at Dartmouth, Hanover, NH  
 2018-  
 2020 Graduate Student Council Executive, Dartmouth College, Hanover, NH  
 2021- Quantitative Biomedical Sciences Ad-Hoc Reviewer Master's Admission Committee, Hanover, NH  
 2022- Biostatistics and Bioinformatics Shared Resource Faculty, Hanover, NH  
 2022- Bioinformatics Curriculum Committee, Quantitative Biomedical Sciences, Hanover, NH  
 2022 PhD Qualification Exam Committee Chair, Jeff Joseph, Hanover, NH  
 2023 Bachelor's High Honors Thesis Committee Member & Co-Advisor, Gokul Srinivasan, Hanover, NH  
 2023 Digital Health Advisory Group, Medical School Curriculum Committee, Geisel School of Medicine, Hanover, NH  
 2023 Dartmouth Cancer Center Developmental Grant Reviewer, Lebanon, NH

#### **XVII. MEMBERSHIPS, OFFICE, AND COMMITTEE ASSIGNMENTS IN PROFESSIONAL SOCIETIES:**

2017-  
 2019 Artificial Intelligence (AI) Enthusiast Club, Walnut Creek, CA, Founder  
 2018-  
 2019 QuantBlitz Data Science Club, Hanover, NH, Member  
 2019 Epidemiology Students Club, Hanover, NH, Member  
 2020-  
 2021 Natural Language Processing (NLP) Consultant, Department of Psychiatry, Hanover, NH  
 2019-  
 2020 International Society for Computational Biology and Bioinformatics  
 2022 Association for Computing Machinery  
 2021- Quantitative Biomedical Sciences Ad-Hoc Reviewer Master's Admission Committee, Hanover, NH  
 2022- Dartmouth Cancer Center, Cancer Population Sciences  
 2022- Dartmouth Cancer Center, Metals in cancer working group  
 2022- Dartmouth Cancer Center, Biostatistics and Bioinformatics Shared Resource  
 2022- Quantitative Biomedical Sciences Bioinformatics Curriculum Committee, Hanover, NH

#### **XVIII. EDITORIAL BOARDS:**

2021- Frontiers in Medical Technology  
 present Co-Guest Editor  
 2021- Cancers  
 present Co-Guest Editor

#### **XIX. JOURNAL REFEREE ACTIVITY:**

Crohn's and Colitis 360 (x1)  
 Pacific Symposium on Biocomputing (x3)  
 BMC Biomedical Medical Research Methodology (x1)  
 Laboratory Investigation (x2)  
 PLOS Computational Biology (x3)  
 Cancer Cytopathology (x1)  
 Computational Statistics & Data Analysis (x1)  
 Computerized Medical Imaging and Graphics (x2)  
 Computer Methods and Programs in Biomedicine (x2)  
 Clinical Epigenetics (x2)  
 Journal of Translational Medicine (x1)  
 Neural Processing Letters (x1)

All Life (x1)  
 BMC Medical Informatics (x2)  
 BMC Bioinformatics (x2)  
 The Lancet (x1)  
 Nature Communications (x3)  
 Nature Scientific Reports (x4)  
 IEEE Journal of Biomedical and Health Informatics (x1)  
 Bioinformatics (x1)  
 Frontiers in Education (x2)  
 Cancers (x2)  
 Annals of Applied Statistics (x1)  
 Journal of Medical Artificial Intelligence (x1)  
 NAR Genomics and Bioinformatics (x1)  
 Biomolecules (x1)  
 American Journal of Pathology (x1)  
 Clinical and Translational Medicine (x1)  
 Histopathology (x1)  
 JAMA Oncology (x1)

#### **XX. AWARDS AND HONORS:**

2015-2017	UC Berkeley, Dean's List (Fall 2015, Spring 2016) Honors (All Semesters); Highest Distinction; Cum. GPA: 3.97 / 4.0; Major GPA: 3.98 / 4.0
2020	Geisel School of Medicine at Dartmouth College Center for Quantitative Biology Travel Award    \$2,000
2020	BIOSTEC 2020 Comp2Clinic Workshop, Best Paper
2021	Modern Pathology Article Top Pick of January 2021
2022	Guarini School of Graduate and Advanced Studies <a href="#">Hannah Croasdale</a> Award for academic excellence    \$1,000
2023	2022 Faculty Publication Recognition, Department of Pathology and Laboratory Medicine, DH
2023	The American Journal of Pathology Editor's Choice Article

#### **XXI. INVITED PRESENTATIONS:**

(\*) those presentations to which an individual invitation was extended  
 (#) those presentations that were meetings where a poster/talk, was presented at a large society meeting)  
 (^) if the talk/presentation was applicable as a CME activity.

#### **International:**

2020	Preliminary Evaluation of Generative Image Translation Technologies for Histopathology Podium presentation (Best Paper Award), Biomedical Engineering Systems and Technologies (Biostec) 2020 C2C Workshop, Valletta, Malta
2022	Federated Data Networks, <i>SIGAPP ACM 2022</i> , Virtual Conference
2022	Multimodal Learning, <i>SIGAPP ACM 2022</i> , Virtual Conference

2022 Graph Neural Networks for Lymphocyte Prediction, GeoMedia Workshop, *MICCAI*, Amsterdam

### **National**

2017 Snapshots of genome evolution and population dynamics in the allopolyploid grass *Brachypodium hybridum*. Poster, American Society of Plant Biologists (ASPB), Honolulu, HI

2020 PathFlowAI: Scalable Digital Pathology  
Pacific Symposium Biocomputing 2020, Kona, HI

2021 Topological Feature Extraction for Whole Slide Images with Graph Neural Networks  
Podium Talk, Pacific Symposium Biocomputing 2021, Kona, HI

2021 Digital spatial profiling identifies novel biomarkers for locally invasive tumors, *Association for Molecular Pathology 2021*, Virtual

2022 Mixed effects machine learning on spatially localized immuno-oncology markers for colon metastasis prediction  
Pacific Symposium Biocomputing 2022, Kona, HI

2023 Advancing Clinical Translational Sciences through Validation of Emerging Artificial Intelligence Technologies, Cedars Sinai Medical Center, Los Angeles CA

2023 Artificial Intelligence for Prediction of Spatial Transcriptomics from Whole Slide Images, Enhanced with CytAssist, 10x Genomics User Group Meeting, Boston MA

### **Local/Regional**

2018 Where are Your Bug's Genes and What do They Do? Workflow Automation and Machine Learning for Gene Annotation and Function. Zymergen, Emeryville, CA & Seattle, WA

2019 Machine Learning Analytics of Pancancer Methylation Microarray and RNA-sequencing Profiles at Susceptibility Loci. Poster, Celebration of Biomedical Research at Dartmouth (CBRaD), Hanover, NH

2019 MethylNet: A Modular Deep Learning Approach to DNA Methylation Prediction  
Quantitative Biomedical Sciences: (QBS) Retreat and NCCC Retreat, Hanover NH

2020 PathFlowAI: Scalable Digital Pathology  
Dartmouth-Hitchcock Retreat, Hanover NH

2020 Improving Data Representation Software for DNAm and Histopathology,  
Research in Progress, QBS, Hanover, NH

2020 Mortality Prediction from Satellite Imagery  
Burroughs Wellcome Fellowship, Hanover, NH

2020 Automating the Paris System  
Burroughs Wellcome Fellowship, Hanover, NH

2021 Opportunities for Machine Learning Research in Pathology and Dermatology  
Department of Dermatology, Hanover, NH

2021 Introduction to Neural Networks, Guest Lecture for QBS Class, Hanover NH

- 2021 Application of Hierarchical Bayesian Methods for Medical Artificial Intelligence, Guest Lecture for QBS Class, Hanover NH
- 2021 Uncertainty in Disease Staging, Research in Progress, QBS, Hanover NH
- 2021 Emerging Diagnostic and Investigative Technologies: Validation of Deep Learning Technologies for DNA Methylation and Histopathology, Thesis Seminar Talk, Hanover NH
- 2021 Emerging Machine Learning Methods in Digital Pathology, EDIT Seminar Talk, Hanover NH
- 2021 Opportunities for Machine Learning Research in Pathology, QBS, Hanover NH
- 2021 R Software Packaging, Guest Lecture for QBS Class, Hanover NH
- 2021 Research Overview, Department of Epidemiology, Hanover NH
- 2021 Mixed effects machine learning on spatially localized immuno-oncology markers for colon metastasis prediction, NCCC Retreat, Lebanon NH
- 2022 Introduction to Machine Learning and Research Opportunities in Pathology and Dermatology, Geisel School of Medicine Medical Student AI Interest Group, Lebanon NH
- 2022 Rapid 100% Margin Assessment through AI in the Surgical Pathology Setting, Melanoma Retreat, DHMC, Lebanon NH
- 2022 EDIT Machine Learning Internship Program, Dermatology Research Night, DHMC, Lebanon NH
- 2022 Introduction to Neural Networks, Guest Lecture for QBS177 Class, Hanover NH
- 2022 Advancing Clinical Translational Sciences through Validation of Emerging Artificial Intelligence Technologies, Cancer Population Sciences, Hanover NH
- 2022 Medical AI Opportunities, Oakland Tech, Oakland CA
- 2022 Artificial Intelligence @ Dartmouth Health, Guest Lecture for ENGS 56, Thayer School of Engineering, Hanover NH
- 2022 Virtual QBS Master's Capstone Conference, QBS, Hanover NH
- 2022 Virtual EDIT AI Conference, DHMC, Hanover NH
- 2022 EDIT: Advancing Clinical Translational Sciences through Validation of Emerging AI Technologies, QBS, Hanover NH
- 2023 Introduction to Neural Networks, Guest Lecture for QBS177 Class, Hanover NH
- 2023 Advancing Clinical Translational Sciences through Validation of Emerging Artificial Intelligence Technologies, Cancer Epidemiology Special Seminar, Hanover NH
- 2023 Predicting colon cancer metastasis through spatial molecular characterization of the tumor immune microenvironment, Cancer for Quantitative Biology Research in Progress, Hanover NH

- 2023 Predicting colon cancer metastasis through spatial molecular characterization of the tumor immune microenvironment, Cancer for Quantitative Biology External Advisory Committee Meeting, Hanover NH
- 2023 Artificial Intelligence @ Dartmouth Health, Guest Lecture for ENGS 56, Thayer School of Engineering, Hanover NH

## XXII. BIBLIOGRAPHY:

### A. Peer-reviewed publications in print or other media

#### PhD Thesis:

1. **Levy J.** Emerging Diagnostic and Investigative Technologies: Validation of Deep Learning Technologies for DNA Methylation and Histopathology. 2021

#### Reviews:

1. **Levy J**, Vaickus L. Applications of AI in Anatomic Pathology. *Advances in Molecular Pathology*, 2021

#### Book Chapters:

1. **Levy J**, Vaickus L. Applications of AI in Molecular Pathology. *Diagnostic Molecular Pathology*, 2023

#### Original articles:

1. **Levy J**, Titus A, Salas L, Christensen B. PyMethylProcess - convenient high-throughput preprocessing workflow for DNA methylation data. *Bioinformatics*. 2019.
2. **Co-first:** \*Gordon SP, \* **Levy J**, Vogel JP. PolyCRACKER, a robust method for the unsupervised partitioning of polyploid subgenomes by signatures of repetitive DNA evolution. *BMC Genomics*. 2019.
3. **Levy J**, Titus AJ, Petersen CL, Chen Y, Salas LA, Christensen BC. MethylNet: An Automated and Modular Deep Learning Approach for DNA Methylation Analysis. *BMC Bioinformatics*. 2020.
4. **Levy J**, Salas LA, Christensen BC, Sriharan A, Vaickus LJ. PathFlowAI: A High-Throughput Workflow for Preprocessing, Deep Learning and Interpretation in Digital Pathology. *Pacific Symposium on Biocomputing*, 2020;25:403–14.
5. **Levy J**, O'Malley AJ. Don't Dismiss Logistic Regression: The Case for Sensible Extraction of Interactions in the Era of Machine Learning. *BMC Medical Research Methodology*. 2020.
6. **Levy J**, et al. Preliminary Evaluation of the Utility of Deep Generative Histopathology Image Translation at a Mid-Sized NCI Cancer Center. *Proceedings of the 13th International Joint Conference on Biomedical Engineering Systems and Technologies (BIOSTEC 2020) - Volume 3: BIOINFORMATICS*
7. **Levy J**, et. al. Topological Feature Extraction of Whole Slide Images with Graph Neural Networks. *Pacific Symposium on Biocomputing*. 2021.
8. **Levy J**, et. al. A Large-Scale Internal Validation Study of Unsupervised Virtual Trichrome Staining Technologies on Non-alcoholic Steatohepatitis Liver Biopsies. *Modern Pathology*, 2021
9. **Levy J**, Chen Y, et al. Biologically Motivated Organization of DNAm Neural Networks, Inspired by Capsule Networks, NPJSBA, 2021.

10. **Levy J**, et. al. Journey across Epidemiology's Third Variables: An Anesthesiologist's Guide for Successfully Navigating Confounding, Mediation, and Effect Modification. *BMJ RAPM*, 2021.
11. **Levy J**, Lebeaux, R. M., Hoen, A. G., et al. Using Satellite Images and Deep Learning to Identify Associations Between County-Level Mortality and Residential Neighborhood Features Proximal to Schools: A Cross-Sectional Study. *Frontiers in Public Health* 9, 1652 (2021).
12. **Levy J**, Bobak C, et. al. Mixed Effects Machine Learning Models for Colon Cancer Metastasis Prediction using Spatially Localized Immuno-Oncology Markers. *Pacific Symposium on Biocomputing*. 2022.
13. **Levy, J.**, Vattikonda, N., Haudenschild, C., Christensen, B. & Vaickus, L. Comparison of Machine Learning Algorithms for the Prediction of Current Procedural Terminology (CPT) Codes from Pathology Reports. *Journal of Pathology Informatics* (2022)
14. Co-first: \*Kelliher, M., \***Levy, J.**, \*Nerenz, R., et.al. Comparison of Symptoms and Antibody Response Following Administration of Moderna or Pfizer SARS-CoV-2 Vaccines. *Archives of Pathology & Laboratory Medicine* (2022).
15. **Levy, J. J.** et al. Machine Learning Approaches for Hospital Acquired Pressure Injuries: A Retrospective Study of Electronic Medical Records. *Frontiers in Medical Technology* 4, (2022).
16. **Levy J**, et. al. Uncovering Additional Predictors of Urothelial Carcinoma from Voided Urothelial Cell Clusters Through a Deep Learning Based Image Preprocessing Technique. *Cancer Cytopathology* 2022.
17. **Levy J**, et. al. Large-Scale Longitudinal Comparison of Urine Cytological Classification Systems Reveals Potential Early Adoption of The Paris System Criteria. *Journal of the American Society of Cytopathology* 2022.
18. **Levy J**, et. al. Video-Based Deep Learning to Detect Dyssynergic Defecation with 3D High-Definition Anorectal Manometry. *Digestive Diseases and Sciences*, 2022
19. **Levy J**, Vaickus L. Virtual Staining. *Pathology Outlines* (2022).
20. **Levy J**, et. al. Artificial Intelligence, Bioinformatics, and Pathology: Emerging Trends Part I— An Introduction to Machine Learning Technologies. *Advances in Molecular Pathology* (2023).
21. **Levy J**, et. al. Artificial Intelligence, Bioinformatics, and Pathology: Emerging Trends Part II— Current Applications in Anatomic and Molecular Pathology. *Advances in Molecular Pathology* (2023).
22. **Levy J**, et. al. Identification of Spatial Proteomic Signatures of Colon Tumor Metastasis using the Digital Spatial Profiler. *The American Journal of Pathology* (2023).

#### **XXIII. Personal Statement:**

My formal background and training are in Physics and Quantitative Biomedical Sciences, the latter of which is an interdisciplinary data science discipline at the intersection of Epidemiology, Biostatistics and Bioinformatics. My experience in Physics motivated me to think abstractly about how information could be represented using n-dimensional objects, which has been of great benefit as my research shifted towards applied machine learning. Prior to my PhD training, I learned to develop, implement, and deploy over one hundred sophisticated reproducible, containerized genomics and bioinformatics workflows at scale in High Performance Computing (HPC) computing environments as a software developer/engineer at both the Lawrence Berkeley National Labs and Zymergen, which instilled in me a mindset of doing public good through high throughput computations. My motivations for my recent career aspirations originated through my work in the San Francisco Department of Public Health (SFDPH), where I witnessed first-hand some of the many challenges associated with implementing new digital technologies in a healthcare setting which was, at times, averse to change and frustrations on behalf of the stakeholders. This inspired me to think more critically about how to engage stakeholders, and now that I am in a position to develop and implement these novel biomedical technologies, I have taken these principles to heart by directly integrating with the stakeholders which I aim to benefit. I served as a Burroughs Wellcome Fellow, which enabled me to build closer relationships with the Department of Pathology.

Currently, I serve as an Assistant Professor of the Departments of Pathology and Laboratory Medicine, and Dermatology, an Adjunct Professor of Epidemiology, and faculty in the Quantitative Biomedical Sciences Graduate program and Biostatistics and Bioinformatics Shared Resource (Dartmouth Cancer Center). I am one of the founders and the co-director of the Machine Learning arm of the Emerging Diagnostic and Investigative Technologies (EDIT) program. My research group (<https://levylab.host.dartmouth.edu/>) aims to justify the use of digital pathology technologies by developing and validating machine learning technologies and envisioning how they would fit into the clinical workflow. As such, I am in an optimal position to develop and implement digital pathology technologies through effective stakeholder engagement. To this end, my doctoral work centered around creating standardized, high throughput, open-source software to enable domain experts to extract key insights from two high dimensional data types, DNA Methylation (DNAm) and histopathological

data, while validating emerging technologies which could provide immediate benefit to the end user, such as processes to virtually stain tissue to obviate the need for chemical tissue staining. My research group's aims extend beyond these original objectives to include new aims such as: 1) integration of hierarchical Bayesian statistical methodologies with machine learning technologies to provide fair assessments of digital pathology technologies, 2) further methods development and validation of spatial omics technologies, with 3) applications to further understanding of disease pathogenesis and epidemiology. My lab is also developing health informatics technologies that integrate multiple biomedical data modalities, from natural language processing to temporally captured diagnostic codes and lab measurements. I am committed to the vision of creating a self-sufficient digital pathology program in EDIT through building an independent research lab composed of researchers with diverse, interdisciplinary skillsets. My mentorship experience to date includes launching a year-round national internship program which has run successfully for three years. I have directly mentored 55 high school, 14 undergraduate, 15 Master's, 13 medical students, and 4 pathology resident fellows, and am taking on PhD rotation students (4 rotation students and 1 MD PhD student). I am currently mentoring one PhD student through the Burroughs Wellcome Fund for their dissertation work to study molecular and histological markers of healthy fetal development. Recently, I was awarded the Hannah T. Croasdale award for academic excellence, which was given based on a "sense of social responsibility to the community of scholars".

I am a member of the Cancer Population Sciences Program, which prides itself on interdisciplinary collaboration amongst basic and physician science researchers, broadly covering the identification of precancerous exposures and somatic alterations elucidated through environmental and molecular epidemiology, using data from translational research to inform our understanding of disease processes and iteratively refine translational work, to the implementation and dissemination of key findings. The research aims of my lab are optimally aligned with these pursuits— my lab is chiefly focused on tackling public health challenges through high throughput computation and building an understanding of which technologies are optimally aligned with stakeholders and thus likely to have a positive impact on the greater community.
